

EXPERIMENT-3

Create a simple cloud software application for Property Buying & Rental process (In Chennai city) using any Cloud Service Provider to demonstrate SaaS.

AIM: To create and provide a cloud-based Property Buying and Rental System for Chennai City using Zoho Creator to demonstrate the Software as a Service (SaaS) model.

PROCEDURE:

- 1) Open a web browser and log in to Zoho Creator using a valid Zoho account.
- 2) Click on Create App and select From Scratch → Blank App.
- 3) Enter the application name as Property Buying & Rental System – Chennai and create the app.
- 4) Create a new form named Property Details to store property information.
- 5) Add required fields such as Property Type, Purpose (Buy/Rent), Locality in Chennai, Price, and Contact Details.
- 6) Create another form named Customer Details to collect buyer or tenant requirements.
- 7) Add fields such as Customer Name, Requirement Type, Preferred Area, Budget, and Contact Number.
- 8) Create List Reports for Property Details and Customer Details to display records.
- 9) Configure user access and sharing settings to allow multiple users to access the application.
- 10) Generate the application URL and access the cloud-based Property Buying & Rental System through a web browser.

OUTPUT:

The screenshot shows the Zoho Creator interface for creating a 'Property Buying & Rental in Chen... property details' application. The 'Basic Fields' section on the left lists various field types: Name (Text), Email (Text), Address (Text), Phone (Text), Single Line (Text), Multi Line (Text), Number (Text), Date (Text), and Time (Text). The 'Field Properties' section on the right shows the configuration for the 'Property Type' field, which is set to 'Text' type, linked to 'Property_Type' in the database, and has 'House', 'Flat', and 'Plot' as choices. A note indicates that renaming choices will update existing records. The 'Field References' section shows a link to 'View Field References'. At the bottom, there are status bars for 'Smart Chat', 'Trial expires in 15 days', 'Upgrade', 'Get started faster', 'Help', and system information including temperature (27°C), weather (Sunny), language (ENG IN), and date (17-12-2025).

RESULT:

A cloud-based Property Buying & Rental System for Chennai City was successfully created using Zoho Creator. Users can view property listings, enter customer requirements, and access the system through a web browser without installation, thereby successfully demonstrating the Software as a Service (SaaS) model.
